PRODUCT SPECIFICATIONS

AV-30M

PRODUCTION RATE/CYCLE TIME

The AV-30M can process up to 250 kg per cycle (551 lb.), depending on product size and packaging. Excluding hold time, the complete cycle time is approximately 4.5 minutes.

Cycle Count: 75,366

CE Certified, ASME Certified

Manufactured: 2014

Maximum operating pressure: 600 MPa (87,000 psi)

Maximum vessel temperature: 50° C (122° F)

Pressure vessel volume: 350 liters (92.5 gal)

Total vessel and frame weight on foundation: 46,000 kg (101,000 lbs.)

Length including material handling: 14.1 m (46.3') including extension, or 12.5 m (41.0') excluding

Width of press: 3.9 m (12.8')

30XQ intensifier pump (dual configuration)

Water module dimensions: 3,000 kg (6,600 lbs.)

Power requirements, dual pump configuration: 300 kVA, 3-phase, 400 V, 50 Hz
